What Are the Dangers of Fireworks?

If not handled properly, fireworks can cause burns and eye injuries in kids and adults. The best way to protect your family is not to use any fireworks at home — period. Attend public fireworks displays, and leave the lighting to the professionals.

Lighting fireworks at home isn't even legal in many areas, so if you still want to use them, be sure to check with Civil Aviation department first Tel: 22819

Fireworks Safety

- Kids should never play with fireworks. Things like firecrackers, rockets, and sparklers are just too dangerous. If you give kids sparklers, make sure they keep them outside and away from the face, clothing, and hair. Sparklers can reach 1,800°F (982°C) — hot enough to melt gold.
- Buy only legal fireworks (legal fireworks have a label with the manufacturer's name and directions; illegal ones are unlabeled), and store them in a cool, dry place. Illegal fireworks usually go by the names M-80, M100, blockbuster, or quarterpounder. These explosives were banned in 1966, but still account for many fireworks injuries.
- Never try to make your own fireworks.
- Always use fireworks outside and have a bucket of water and a hose nearby in case of accidents.
- Steer clear of others setting off fireworks. They can backfire or shoot off in the wrong direction.
- Never throw or point fireworks at someone, even as a joke.
- Don't hold fireworks in your hand or have any part of your body over them while lighting. Wear eye protection, and don't carry fireworks in your pocket — the friction could set them off.
- Point fireworks away from homes, and keep away from brush and leaves and flammable substances.
- Light one firework at a time (not in glass or metal containers), and **never** relight a dud.
- Don't allow kids to pick up pieces of fireworks after an event. Some may still be ignited and can explode at any time.
- Soak all fireworks in a bucket of water before throwing them in the trash can.
- Think about your pet. Animals have sensitive ears and can be very frightened or stressed and other big celebrations. Keep pets indoors to reduce the risk that they'll run loose or get injured.

If an Injury Happens

If a person is injured by fireworks, immediately go to a doctor or hospital.

If an [eye injury](#) happens:

- Don't let the person touch or rub it, as this may cause even more damage.
- Don't flush the eye out with water or try to put any ointment on it.
- Cut out the bottom of a paper cup, place it around the eye, and get medical care right away — the person's eyesight may depend on it.

If the person is [burned](#):

- Remove clothing from the burned area.
- Call your doctor immediately.

RELEASE OF LIABILITY

I, _____, am aware of the dangers of fireworks and I am willing to assume full responsibility for any personal or property damage due to the display of fireworks. The applicant/group/agency agrees to indemnify and hold the harmless from any claims or liability, including other defence costs, which may arise from the use, storage, transportation or possession of fireworks.
