

RPAS FLIGHT APPROVAL APPLICATION

Email: info@caav.vu

Tel: +678 [22819](tel:22819)

Attach a clear copy of your Passport/National Identity Card (NIC) along with the application.

(This is applicable for owner and all the other remote pilots)

The Civil Aviation Authority of Vanuatu will review your request and get back to you within **5 working days**.

Flight Approval is issued once payment is made.

The charge is based on the requested flight time.

IMPORTANT NOTICE

1. In all instances, unmanned aircraft must not operate within low flying zones.

What is "low flying zones?"

That is 1000 feet above congested areas and 500 feet above rural areas. *Low flying aircraft are generally located near airports, in low flying zones used for pilot training or when they are conducting an operation that requires them to fly below the safe minimum altitudes published in Part 91.*

2. Unmanned aircraft are required to give way to all manned aircraft. *It is the operator's responsibility to ensure that this rule is complied with at all times.*
3. Operators should never operate an unmanned aircraft when impaired by drugs or alcohol.
